Complete Control

No time to be wasted Hangin' 'round with you I've got better things to shoot for And little time to do Can't you see I've got it With no help from you I've turned around, knocked you down and burned the bridge from you

I want control I've got to get control with no regrets, naturally I want complete control

Oh changes will be made To keep control for good I'll change the whole world And everything around you I don't need no help And nothing from you I'll get everything I want You know it will be true

Complete control Complete control Complete control **Total Chaos**
