

Love Is All We Need

Total

Love is all we need
It is the key that holds us together now
I need to know what you want
I need to know what you need
Baby can't you see, this is for you and me

Take a look around at what we have, yeah
How could I help you understand
I'm trying to figure out what love is all about

Love is all we need
It is the key that holds us together now
I need to know what you want
I need to know what you need
Baby can't you see, this is for you and me

I can't do this on my own
Being together makes it easier than for us to be alone
I need you babe, to show signs that you really care

And if you have any doubts
I'll help you work them out
There's no need to fear, I'm here
'Cos that's what love's all about

Love is all we need
It is the key that holds us together now
I need to know what you want
I need to know what you need
Baby can't you see, this is for you and me

Just a little love, love is all we need
Take a look around, baby can't you stay with me?
I need to know, oh baby can't you see?

I want to know what you want
I really want to know what you need
Baby, baby, baby

Just a little love, love is all we need
Take a look around, baby can't you stay with me?
I need to know, oh baby can't you see?

I want to know what you want
I really want to know what you need
Baby, baby, baby
