

Holy War

Toto

Run... they say it's Armageddon
Hide... we're very near the end
Fear... the promise of a nation
It's getting harder to defend

Come in, come in
Relax, relax
There's no sweets

Please give more than I have

I know, I know
You are, you are
Trying to scare me

I got nothing to spare

Save all the shit about love and freedom
Sounds like shit to me

Holy war...
Show me what you've been concealing
All in the name of peace and love
What are we fighting for
I thought the point was healing
Clearly I was did wrong

Truth... beyond your comprehension
Lies... above and far beyond
I think that every execution
Will be televised onto your phone

Come in, come in
Relax, relax
There's no crime scene

'Cause I am what I am

I know, I know
You are, you are
Trying to shock me

I don't easily scare

There are, the shit about love and freedom
It's a shameless lie to me

Holy war...
Show me what you've been concealing
All in the name of peace and love
What are we fighting for
I thought the point was healing
Clearly I was did wrong

Holy war...
Show me what you've been concealing
All in the name of peace and love

What are we fighting for
I thought the point was healing
Clearly I was did wrong
