## Home of the Brave

Everything's gonna be alright boys Help is on the way Hold your head up high now There's no need to cry now We're not running anymore Leave the politics behind boys They're not working anymore There's so much more at stake here It's make or break here Haven't we been here before Tell me what we're waiting for You gotta remember You don't have to be afraid You still have the freedom to learn And say what you wanna say You gotta remember Don't let 'em take away The land we call the home of the brave Who sings the song of the people You don't hear it anymore I heard it late last summer To the beat of a different drummer It never sounded quite like this before So you're trying to shake this feeling That trouble's right outside the door You lie awake each dark night Like a time bomb wound up too tight A storm in waiting just offshore Tell me what we're waiting for You gotta remember You don't have to be afraid You still have the freedom to learn And say what you wanna say You gotta remember Don't let 'em take away The land we call the home of the brave You gotta remember You don't have to be afraid You still have the freedom to learn And say what you wanna say You gotta remember Don't let 'em take away The land we call the home of the brave [repeats 2x]
