

# Scars

Tove Lo

Scars we carry  
Carry with memories, memories burned by the dark  
Try to see clearly  
Tears we bury  
Bury in vain cause the pain got us falling apart  
Try to see clearly

Now let the healing start  
The fires out of guns  
We keep it in our hearts  
We're like a thousand suns  
Ooh, yeah, every day, step by step, we dare to love again  
And if we lose our grip, meet you at the end

Know they're cutting you deep  
Feel the scars in your sleep  
What didn't kill us made us stronger  
Stories left on our skin  
Wear them with everything  
What didn't kill us made us stronger

Don't feel lonely  
Loneliness kills all the thrill from standing alone  
Try to see clearly

Now let the healing start  
The fires out of guns  
We keep it in our hearts  
We're like a thousand suns  
Ooh, yeah, every day, step by step, we dare to love again  
And if we lose our grip, meet you at the end

Know they're cutting you deep  
Feel the scars in your sleep  
What didn't kill us made us stronger  
Stories left on our skin  
Wear them with everything  
What didn't kill us made us stronger  
Know they're cutting you deep  
Feel the scars in your sleep  
What didn't kill us made us stronger  
Stories left on our skin  
Wear them with everything  
What didn't kill us made us stronger

Feet don't fail me now, no  
What didn't kill us made  
What didn't kill us made us stronger  
Feet don't fail me now  
What didn't kill us made  
What didn't kill us made us stronger
