

# City Of A Million Graves

## Toxic Holocaust

We arrived by the hundreds, a gang of the dead  
Donning our weapons and cycles of steel  
Deformed and demented and living in filth  
Riding through cities lusting for death...yeah

Moonlight brightens the dark city streets  
We are the hunted so fire at will  
Surviving by chance, alive just by luck  
We gotta move to see another day

Violence, destruction and hate  
Where gangs are ruling the waste  
You've entered the city of graves  
Where one million couldn't be saved

Kill or Die

Dressed in all black to hide in the night  
Looting and raping the law of the land  
Fighting for water, food and for fuel  
Better get tough, get strong or die

Apocalypse city still trapped in smoke  
One million deaths gone in a flash  
Buried in rubble, family and friends  
Fallout and dust clouds bring death to all

Riding Through Filth

Corpses awakened, awakened by nukes  
Atomic power that brings back the dead  
Humans living with melted off skin  
Features mutated and rotting off bone

Endless bodies brought back to life  
A putrid display where no one could win  
The future is bleak with no end in sight  
The city's a bomb, everyone dies
