

Ring the Bells

Toxique

Sunbeam, kiss me, please,
Most softly as he used to kiss me
Moonshine, touch my lips
I'll close my eyes and call him back
I hear
Ringing the bells
Ringing the bells
Whispering bells in my heart

Love, why you always gotta run from me?

We ring the bells, ring the bells
We make the spells, make the spells
And what'd they tell? What'd they tell?
They ring and yell, ring and yell

Night falls on my head
I'm sitting by the open window
Like a beast which is not fed
Still I got to hold his pillow
I hear
Ringing the bells
Ringing the bells
Whispering bells in my heart

We ring the bells, ring the bells
We make the spells, make the spells
And what'd they tell? What'd they tell?
They ring and yell, ring and yell

Love, why you always gotta run from me?
