

Arabian Nights

Tracedawn

I've got a fetish I wont tell you about it
but I'll hope you notice
Notice how I roam around
longing for your skin to meet my lips
Hey, how do you get your kicks?
I wanna shoot you with a fix of my smoothest tricks
Love you like a poet and fuck you like a caveman
Damn I can't believe it
how you shake me up like a tidal wave
Lonely days are gone
when our ship sets sails for the end of the world

A thousand nights I'd bleed your love
A thousand nights it's true
A million miles I'd dive in space
A million miles for you

For you I'll fly to the moon
and I'll bathe you in the blue lagoon
The angels sing their song
while I pelvic-thrust like a nuclear bomb
Yeah I knew it all along
none of this just cant be wrong
This is magic this is strong
so close your eyes and have it all
I'll give you a thousand nights

A thousand nights I'd bleed your love
A thousand nights it's true
A million miles I'd dive in space
A million miles for you
