This House

Tracie Spencer

Where do we go from here? What must we do to make that change? It's time to understand, understand one another In a world so cold a place of disbelief Where will the people go without enough to eat Let's not give up hope We have to find a way Search within our soul to make a better day

This house is our house Let's do it for the people This house is their house Let's give it back to the people The people of the world today I see hurt in their eyes I hear the sounds of voices cry It's time to open our eyes Time to help one another In a world so cold a place of disbelief Where can the people go to find a place to sleep Let's not give up hope we have to find a way Search within our soul to make a better day

You-Me-We can make the difference And you know no one, no one likes to be alone We got to face it heart to heart We have to make a brand new start We got to change the tears to smiles We have to go the exta mile (you-me) It's time we face reality (We can make the difference) Give them hope and set them free I think it's time we say goodbye To all the homeless people's cry

We've got to take the time to search the mind to find This house, our house (It's all in the hands of love) (I said it's all in the hands of love)
