

# Footprints On The Moon

Tracy Lawrence

Woah, woah, yeah  
Let's catch a ride on a shooting star  
We'll wave goodbye when we pass mars  
When it comes to loving you  
The sky ain't the limit 'cause there's footprints on the moon  
Woah, woah, yeah

Hey girl you got my head in the clouds tonight  
Ain't nothing bringing me down 'cause you got me up so high  
Not even gravity got a chance to hold back you and me  
Let see how far this love will let us go  
That kiss on your lips that touch on your fingertips  
You and me we got a million miles to go so

Let's catch a ride on a shooting star  
We'll wave goodbye when we pass mars  
'Cause when it comes to loving you  
The sky ain't the limit 'cause there's footprints on the moon  
Woah, woah, yeah

Who needs the sunshine when I got the light in your eyes  
Who needs this little town when we got the keys to the sky  
Gonna take you to another world  
And show you you're the only girl  
That I wanna give all of my love to so

Let's catch a ride on a shooting star  
We'll wave goodbye when we pass mars  
'Cause when it comes to loving you  
The sky ain't the limit 'cause there's footprints on the moon

I'm gonna blow your heart away  
Slow dancing on the milky way

Woah, woah, woah, yeah  
Let's catch a ride on a shooting star  
We'll wave goodbye when we pass mars  
'Cause when it comes to loving you  
The sky ain't the limit 'cause there's footprints on the moon

Woah, woah, yeah  
Not even gravity got a chance to hold back you and me  
Let see how far this love will let us go  
That kiss on your lips that touch on your fingertips  
You and me we got a million miles to go so

Let's catch a ride on a shooting star  
Wave goodbye when we pass mars  
The sky ain't the limit girl 'cause there's footprints on the moon  
Woah, woah, yeah
