## I'll Be There For You

If I close my eyes forever I know you'll be always there baby we will stay together and this branded love we share

Even though you're not around me babe I know you're not apart from a distance I'm calling and I'm sending you my heart

Baby al I gotta do now is to pray to please hold on I'm saving all my love for you till you'll be coming home I'll be there for you to brighten up your eyes I'll be there for you to make you realise When I lok into the future baby all I see is you I'll be there for you That all I wanna do

Yes; we've been through good and bad times and we know we had it all there were storms we had to weather we've been down this road before

As the world just keeps on turning as the bird that flies so high as the fire keeps on burning our love will never die

As I look into the future baby all I see is you and I'll be there for you That's all I wanna do
