## **Step Into My Life**

Trademark

When the road gets dark and scary You can stop the world and take my breath away You can read me like a book With just one look You make my day

I know everything about you All the little things that no one else see If you're somewhere out there, anywhere Turn the key and share your dreams with me

Step into my life, 'cause I'm waiting here Help me to survive, 'cause I need you near Get there if you can, just no matter fly, run or drive Come on and step into my life

All the flowers fade without you And I dream in black & white, 'cause you're not here So cross that line, give me a sign 'Cause snowflakes fall in June, till you appear
