

Hang It Up

Transit

Hang it up, hang it up when you get home
Lay it out, lay it out, like a map on the floor and
Tear away the edges, you can throw away your fears

You took off like a shot in the dark to shine your light against the world
Will you float out there forever or hang it up when you get home?

Hang it up, hang it up when you get home
Lay it out, lay it out, like a map on the floor and
Tear away the present, you can throw away the past
Slow it down, slow it down... wait up for me, kid
Ride it out, ride it out... listen and forgive (slow it down, slow it down)
Pain is temporary, you will love and you will live
You will live

You took off like a shot in the dark to shine your light against the world
Will you float out there forever or hang it up when you get home?
I never got to say goodbye
I watch my whole town live their lives
Wasted like a jacket left hanging at the bar

Hang it up, hang it up when you get home
Lay it out, lay it out like a map on the floor and
Tear away the present, you can throw away the past
Slow it down, slow it down, wait up for me, kid
Ride it out, ride it out... listen and forgive
Pain is temporary, you will love and you will live
You will love and you will live.
