

Listen & Forgive

Transit

Find me again like a rusted in bike in your back yard
Pull me up from the debris
I'm covered up in dust and leaves

We're lighting fires in July
To cleanse us of the heat
You beg, you plead, you promise not to leave
You're just like everyone
You're just like everything

Smoke reaches for the stars but settles for the glass
You tried your best to save your best for last
But now your time has passed
Now your time has passed

We're lighting fires in July
To cleanse us of the heat
You beg, you plead, you promise not to leave
You're just like everyone
You're just like everything

The only difference is you listen and forgive
Just take it all in and I'll take it all back
You only need to see fireworks once a year
Just take it all in and I'll take it all back

We're lighting fires in July
To cleanse us of the heat
You beg, you plead, you promise not to leave
You're just like everyone
You're just like everything
We're lighting fires in July
Just take it all in and I'll take it all back
