

Song To The Stars

Transvision Vamp

He saddled a rocket to the stars
He saddled a rocket to the stars
He saddled a rocket to the stars
Now I don't know where you are
A whispered goodbye in velvet tones
Left my heart all tattered and torn
Packed all his things in a little case
Never to return to this place
He saddled a rocket to the stars
He saddled a rocket to the stars
He saddled a rocket to the stars
And let loose the sad in my heart
Now every beginning is the start of an end
I won't live 'till I see you again
