

Stay Cold

Trapped Under Ice

Lost concepts of reality
Make loose the screws that secure my sanity
I take a look at my life
What it's all about
The answers bring me pain
And I want out

I pulled you close because the world failed us both
Always knowing nothing could stay gold
The navigator of pain points my way once more
I will always stay cold

You can't hurt me anymore
I stay cold forevermore

So alone
But you can't hurt me anymore
