

Too Close

Trapt

Checking out so soon
How long you been planning this
Is it something that I missed
I would've thought that I was breaking through to you
Did you run out of room
You said that you would take the risk
And now you can't handle it
You took what you can get and now you're through

I can tell by the look on your face
That it's time for you to make an escape
It's my mistake, it's my mistake I never listen when you say

Don't never get too close
Too close, too close to me
You want to get too close
Too close, too close to me
Don't never get too close
Too close, too close to me
I had to find out
Find out for myself

I always knew I'd be the one to take the hit
But I guess I just can't resist
All the mysteries surrounding you
I'm so confused
There are just too many twists
I'll never get away from it
I should've known you were too good to be true

I can tell by the look on your face
That it's time for you to make an escape
It's my mistake, it's my mistake I never listen when you say

Don't never get too close
Too close, too close to me
You want to get too close
Too close, too close to me
Don't never get too close
Too close, too close to me
I had to find out
Find out for myself

Don't never get too close
Too close, too close to me
You want to get too close
Too close, too close to me
Don't never get too close
Too close, too close to me
I had to find out
Find out for myself

Why do you keep me at a distance
Why are you always so resistant
Don't want to wander any longer
Wondering when you'd say

Don't never get too close
Too close, too close to me
You want to get too close
Too close, too close to me
Don't never get too close
Too close, too close to me
I had to find out
Find out for myself

Don't never get too close
Too close, too close to me
You want to get too close
Too close, too close to me
Don't never get too close
Too close, too close to me
I had to find out
Find out for myself
