## **Cortex Deformation**

Deviation. Hate. Agression Struggle for life

What's our mind like What's hidden inside Hidden recesses The fold They carry the grain of blood

Stuffed with world's carcass We feed our worm Which gnaws at our entrails

Abnormally we lap our victims blood We gain new sensations which cause cortex deformation

Deviation. Hate. Agression Stench of rotten brain

It is our food. like ravenous woodworms We penetrate our minds crust To find the stench and rot. So we relish the pain and ectasy of this deed.

How much pleasure sadism gicves us. Masochism in its perverse wear How much bliss is in our victims screams. These deeds drives us to erection.

Deviation. Hate. Agression Stench of evaporating bowels

We cannot resist this theater of grotesque and atrocity Where main part play marquess and marchioness de sade! Let's bow to the audience and tear their sweet throats Let's sink our mouth in the steamy scarlet sea

Deviation... We are all dead! Trauma
