

Chances

Travis

Time goes by
When you want it to fly
Time goes quick
When you want it to stay

We all take our chances every day
Every second, every day
We're making advances
When you look the other way

Well, you're turning on your telly
And you're wondering what you've seen
Do you realise that you
Have lost a friend in me?

Well, we all take our chances every day
Every second, every day
We're making advances anyway
When you look the other way

We all take our chances every day
Every second, every day
We're making advances anyway
When you look the other way
We all take our chances
