

# Safe

Travis

Take all the goods from all the bads  
And tell the people that you've gone away  
Now lift your head up to the sky  
And now you can tell apart the black from the white

And you wish the time they treasure dear  
And my only thought is that they could be right  
Well look, there goes another year  
About as distant as a satellite

And I feel Safe - so Safe  
And I feel Safe - so Safe  
And I feel Safe - so Safe  
So Safe

The world's a small child in the dark  
And my mind's the same place that it's always been  
The monsters seem to fade so fast  
Upon the waking of another dream

And I feel Safe - so Safe  
And I feel Safe - so Safe

And I feel safe, I feel so brave  
I'm not afraid of anything they've got to say  
If you're okay, because your tucked away  
Don't go astray  
You've got to be just who you are, who you are

When I was young things didnt last  
My only cares went to the price of sweets  
Now I'm more older I can laugh  
A darling mixed up man with problem teeth
