Look at me I'm so disgusting I will never find another Quite like you You make me blue With the things you do Look at you you're so familiar We could be so cool together All the time Could all be fine We're on the line The line is fine Open up ma window The line is fine Standing on the ledge Well I don't look down Looking at the people Well they all look fine It's not just life or death Yesterday we talked together But tonight it's just the weather Chillin' me What's the point in silly talking We could get there quicker walking Down the line Could all be fine But we're on the line The line is fine [Chorus] But staring at the faces Standing in a row Thinking of all the places That they have yet to go/They don't know
