

No Way Without You

Treat

I can see you on my radar
From a million miles away
It's the beep that keeps me going
Take it day by day
In a world so full of strangers
That wants my soul to keep
You're the one who saves my sanity
When I fall too deep

So hold on, be strong baby
Long gone, I just wanna say

No way without you, no way without you
You're everywhere, in everything I do
No way without you, no way without you
You're all I am and all I want is you

It's the scent of you that lingers
On the road that never ends
Gotta find the fuel to render, my adrenaline
When I'm dying to be near you
Feeling lost and out of mind
I could let it ache, or pull the break
Lay it on the line

So hold on, be strong baby
Long gone, I just need to say

No way without you, no way without you
You're everywhere, in everything I do
No way without you, no way without you
You're all I am and all I want is you

So hear me now, I'm on my way
Just be strong, I'm coming home

No way without you, no way without you
You're everywhere, in everything I do
No way without you, no way without you
You're all I am and all I want is you
You're all I am and all I want is you
