

# Off We Go

Trent Dabbs

At this stage you just gotta learn to breathe  
Gotta leave what's left, sometimes for better things now  
No one's gonna do it for you  
You're miles beyond all your younger pipe dreams  
The sun is crying and it's making you believe that  
No one's gonna do it for you

So I say we're taking off heading out right now you and me  
Don't care where we land, yeah as long as we're leaving  
We'll find somewhere, nobody will know,  
[Now off we go]

Sleep with the wind while it's still running through your veins  
Pass by faces and not recall all their names Now  
No one's gonna do it for you  
It's not just a feeling like some kind of call to the wild  
More like a longing that you lung towards like a child yeah  
No one's gonna hand this to you

So I say we're taking off heading out right now you and me  
Don't care where we land yeah as long as we're leaving  
We'll find somewhere, nobody will know  
Just take a leap and you'll see that we're all that we need  
Open your eyes wide and then start believing  
We'll land somewhere, nobody will know  
(And off we go)

Yeah I say, we're taking off heading out right now you and me  
Don't care where we land just as long as we're leaving  
We'll find somewhere, nobody will know  
Just take a leap and you'll see that we're all that we need  
Open your eyes wide and then start believing  
We'll land somewhere, nobody will know  
(And off we go)
