Low Point

Trespassers William

I've been scared
Not like this
You lose things, I lost it
Just please reach from somewhere

My heart is done
It's too scared
I've never wished this before now
If I said I did I take it all back

You have to go all the way
To know where it is
All the way down
You know what you'd stop for

When you're running from your worst fear
That you need it
Now I'm fading
This is what I'd like to lay in

I've never wished this before now Now I know all the long steps down This time my eyes close like this I know my last thoughts

I know my last wish
To not be wishing
To not have broke this
To feel what I'm missing

Somehow I broke it I only know breaking And what I want to lie in
