

## Safe, Sound

Trespassers William

I forget, tell me again  
What do you want  
You'll be close, not close enough  
Not close enough for my kind of heart

You say words you can't take back  
Used to be love  
Now it's words hard to look at  
Hard to look at with the lights on

In your head it must not sound so bad  
Or why would you say it  
When you know I feel it  
Whistles through my bones

Alone in a love  
The one that we started  
The one that you ended with some words  
Why'd I start before you said

"I checked it out, it's safe and sound"  
Like I showed you right away  
All the things that eyes can say  
Where you are it must not look so bad

Or why would you do it  
When you know I feel it  
And my eyes are not afraid to cry their way  
Through all you say

I know that what we started  
I think that we ended
