

Everybody Needs Somebody

Trijntje Oosterhuis

Like a summer breeze, running wild
On bare foot, I was free as a child I know
How love would come and go
Like a river that's flowing strong
I could go anywhere, but now I'm holding on to you
Tell me what would you do

Didn't you feel, didn't you notice
Something inside me changed
How can I show you, that it's not over
Love doesn't always have to end this way
Everybody needs somebody
Someone to be true
Love can't be over, didn't you notice
I am still in love when I look at you
Everybody needs somebody
Everybody needs a friend

There's a cold wind blowing and the windows are bare
The doors hang open, but you're not there to see
Something's changed in me
Did you ever know
Have I ever told you, what you mean to me
It's like Joni's song
You don't always know what you got until it's gone

Didn't you feel, didn't you notice
Something inside me changed
How can I show you, that it's not over
Love doesn't always have to end this way
Everybody needs somebody
Someone to be true
Love can't be over, didn't you notice
I am still in love when I look at you
Everybody needs somebody
Everybody needs a friend
If you ever need somebody
I will always love you for my man
