

In Time

Trijntje Oosterhuis

Along you came and washed it all away Fears I had, mean nothing
to me If only for a moment we could Hold each other baby I'd make
you see That the only thing I want right now Is for us to be
close cause your love Your love is making me fly high The
makes my heart become weak If you'd only knew There are no words
to describe the way you shine your light Baby you don't even
know it yet We'll be making sweet love in time Now why do I
feel so shy When you're right beside me and smile Whenever
you want it, I'm feeling so alive, it's clear Cause my heart
never lies There are no words to describe the way you shine
your light Baby you don't even know it yet But we'll be
making sweet love that's right Just give it time There are
no words to describe the way you shine your light Baby
you don't even know it yet We'll be making sweet love in
time, whoa,

Rolling down the road of love Thoughts of you cannot share
If your love it had a name, I would give it all to you
There are no words to describe the way you shine your
light Cause baby you don't even know it yet Making
sweet love in time Why do I feel, Make sweet love in
Whoa, Light makes me fly, yeah Baby shine your
light.
