

## Protection

Tristania

There's a maze  
Of nights and days  
You don't fear the time  
Stars and sky define the road  
And they clear our sight  
I will be your eyes and ears  
Walk with me tonight  
Somewhere ahead the gate is open  
And the woods alive  
Shadows soon rise  
I will move on  
Leave you behind  
Your flame is burning  
Kiss me goodbye  
It's getting late  
I'm still your shield  
The world keeps turning  
Wounds need time to heal  
Hush my child  
Now do not weep  
Put your hand in mine  
I've got promises to keep  
I will stand you by  
I have given life to you  
Find your strength my child  
There is a magic world awaiting  
Made of light and smiles  
Words spoken from the other side  
No more pain, no worrying  
Walk on my child
