All Over Again

Questions of mind -- that words never answer A test of the heart -- we face all alone Are we wasting time -- I can't help to wonder Still we go no -- I know that I can't let you go,

I'm in love with you (all over) I'm in love with you (all over) After all that we've been through All over again

Deep in the night lying beside you It's so easy to feel the love that we share Your body's so warm -- and I need to hold you Close to my heart, tight in my arms, all of my life

You are the one I keep runnin' to Runnin' back to your arms All over again

Triumph
