This World Can't Tear Us Apart

Trivium

I was so empty
Self loathing
Before you awoke me
Lived in transgression
Feasted sin
Destroying all I stood for

A world with spreading disease
They stood for infidelity
They Force feed on their sip of sickness
The prophets hiding their rage
Just sucked out some of the pain
That takes this world into
Lovelessness

All the pain in this world Won't stop us now For we have each other All the hate in this world Can't tear us apart This love is forever

In arms we'll turn away From their ways We'll live like no other Together we're hope Absolute The only thing that matters

A world with spreading disease
They stood for infidelity
They Force feed on their sip of sickness
The prophets hiding their rage
Just sucked out some of the pain
That takes this world into
Lovelessness

All the pain in this world Won't stop us now For we have each other All the hate in this world Can't tear us apart This love is forever

All the pain in this world Won't stop us now All the hate in this world Can't tear us apart

All the pain in this world Won't stop us now For we have each other All the hate in this world Can't tear us apart This love is forever
