

No love
Hold up, hold up, hold up

Afraid, a friend
Afraid, a friend

Set forth for the island
She went for the sky
Dropping the start
She didnt ask why
Youre out on the road, man
Youre flat on your back
Its going with the captive
When you spend like that

See me, see me
See me, see me

Come back, come back
Come back, come back

Set forth for the island
She went for the sky
Dropping the start
She didnt ask why
Youre out on the road, man
Youre flat on your back
Its going with the captive
When you spend like that
We need all the stairs now
Were staring at heights
Weve gotta crack that
You didnt ask why
Time after time I start to forget
As long as Im going
Its getting to get

Well, I got, well, I got
Well, I got, well, I got
