

## Ancient Hate

Tsjuder

Human I despise your humility  
Your blood shall boil!

Apocalyptic storms form beyond  
As the stars fell to the earth  
I penetrated the fabric of reality  
Cause I have seen through the illusions of light  
And I have walked the fields of blight  
Now the soil are dying for my step  
Witness the day of return

Feasting in chaos, celebrating death  
Wrapped in shadows I strike from above  
The one spawned in chaos  
The keeper of ancient hate

Apocalyptic storms form beyond  
As the stars fell to the earth  
I penetrated the fabric of reality  
Cause I have seen through the illusions of light  
And I have walked the fields of blight  
Now the soil are dying for my step  
Witness the day of return

Mankind - face your final death  
The even of chaos  
Mankind - face the black menace  
The eve of Satan
