

Being Alright

Tsunami Bomb

When things are as bad as they can be,
dark curtains rise so you can see...
that the sun sinks to the west and blue fills the sky.
Everyone feels a great relief.
The changing wind has changed our lives.
Nobody knows what's in your future,
though death and unhappiness are certain.
But one thing I can say for sure;
honesty's the perfect cure for any stress-
induced disease you have.
Believe what you do is right,
explain your reasonings,
and everything will be alright.
