

...Not Forever

Tsunami Bomb

I thought that this was solid
Stability and safety sitting in my hand
Just take a look at your life
You're all alone

Who'll be there when I need someone
Count on nobody and no one will let you down
I don't care. Just let me go
I don't need this anymore

Love is not forever
Friendship is not forever
There is nothing set in stone
You're on your own

Who'll be there when I need someone
Count on nobody and no one will let you down
I don't care. Just let me go
I don't need this anymore

I don't need this anymore

Dependence is followed by weakness
Don't be your own hostage
If I know so many, why don't they know me?
They don't know me

Just! Just take a look at your life!
You're all alone!

Now I know what we're made of
Confusion, complication, and uncertainty
I thought this was real, I was wrong
So I don't know

Who'll be there when I need someone
Count on nobody and no one will let you down
I don't care. Just let me go
I don't need this anymore
Who'll be there when I have no one
Don't expect that anyone will go out of their way
I don't care that I'm all alone
I don't need this anymore
