## ...Not Forever

**Tsunami Bomb** 

I thought that this was solid Stability and safety sitting in my hand Just take a look at your life You're all alone

Who'll be there when I need someone Count on nobody and no one will let you down I don't care. Just let me go I don't need this anymore

Love is not forever Friendship is not forever There is nothing set in stone You're on your own

Who'll be there when I need someone Count on nobody and no one will let you down I don't care. Just let me go I don't need this anymore

I don't need this anymore

Dependence is followed by weakness Don't be your own hostage If I know so many, why don't they know me? They don't know me

Just! Just take a look at your life! You're all alone!

Now I know what we're made of Confusion, complication, and uncertainty I thought this was real, I was wrong So I don't know

Who'll be there when I need someone Count on nobody and no one will let you down I don't care. Just let me go I don't need this anymore Who'll be there when I have no one Don't expect that anyone will go out of their way I don't care that I'm all alone I don't need this anymore
