

Blow Me (Like the Wind)

Turbonegro

C'mon
You think I'm fat
But its an optical illusion
You know I'm hot
It's just my chemical solution
So when you hear my mighty call
You better
Hoist your sails and pray for the gods of wind
To blow us all
So blow me
Blow me like the wind
Blow me
Blow me once again
Tonight I'm feeling tops
On the stairs of evolution
I call the shots
In my genetic revolution
Cause I've been waiting
Waiting night and day
Just something good might blow
Might blow my way
So blow me
Blow me like the wind
Blow me
Blow me once again
If I gave you a TENER
Would you raise my antenna
If i gave you a dime
Would you blow my paradigm
If I gave you my candle
Would it be too hot to handle
If I ran for election
Would you support my erection
So blow me
Blow me like the wind
Blow me
Blow me once again
