

# We Ride Together

Turisas

Roll the dice  
name your price  
torn asunder  
loot and plunder  
On the ride  
in the guise  
the great divider  
the gap grows wider  
Pointing fingers laying blame  
the fight goes on, it's a silly game  
black or white  
no hope in sight  
We are falling apart from within  
take my hand;  
once more united we stand  
I remember a day  
in a time faraway  
when we both were in this together  
when we still had the flame  
at the top of our game  
we were strong  
oh we were strong  
It's in times like these we need one another  
through the storms side by side we shall ride  
now and forever  
We had trust we had hope  
pulled at the same end of the rope  
but somewhere down the road  
we lost track of friend and foe  
we lost it all, we lost it all  
it's in times like these we need one another  
through the storms side by side we shall ride  
now and forever  
over snowy mountains  
under star-lit skies  
through the scorching sun  
side by side we ride  
Throw away your pride  
no more blame no more sides  
all of us are in this together  
when the i turns to we  
things will change you'll come to see  
time for change  
it's time for change  
it's in times like these we need one another  
through the storms side by side we shall ride  
now and forever!
