My Turn To Win

Turning Point

Saying goodbye to a false friend isn't hard to do Especially after the pain you put me through I thought I understood you but I only saw the surface Now the plans we made no longer have a purpose Now I see trust takes time and can be abused One again I see it's me who's going to lose When will it be my turn to win Every time I try I end up failing, failing again I've got to face what I'm leaving behind It's my turn to win and it's about time
