

I called you up to say goodnight  
I thought that things would be alright  
But I guess I was dead wrong  
And I just want to stay asleep  
Because thoughts of you are all I dream  
But when I wake up you're gone

For weeks the days I spent felt like forever  
I couldn't get you off my mind  
I wondered how you got inside my head  
And made me think that you were mine  
I thought you meant it when you said forever  
I guess that was a lie  
I still get choked up when I think of you  
It happens all the time

Well there's a place that we used to go  
I pass by now and feel alone  
And wonder if you ever stop here like I do  
And someone told me that they saw you there one night  
Skipping rocks down by the water  
All alone, tears in your eyes

For weeks the days I spent felt like forever  
I couldn't get you off my mind  
I wondered how you got inside my head  
And made me think that you were mine  
I thought you meant it when you said forever  
I guess that was a lie  
I still get choked up when I think of you  
It happens all the time

Your time's all gone  
It's all been spent  
Who's left by your side

Not me anymore
