

Test Pilot

TV on the Radio

Hope it isn't broken, try to keep it open
But I couldn't hold it, smashed it down for all to see
And I tried to get repairs done, I couldn't fix it
So I picked it up and smashed it down for all to see

But I remember when we were so cool
And you were the only one
And now I know that I was such a fool
Thinking you're the only one

R:

(And now we are) We are high and we are fine
(And now we are) And we are gliding through the things that tear us apart
(And now we are) We are high and we are fine
(And now we are) And we are going to need the strength it takes
to pave the way and be the first test pilot

Now we're stumbling through the motions, criminal and careless
Thought you were my best friend, now I couldn't care less, come to see
And you're playing my emotions, way out of proportion
Damage and distortion, blasting through your fantasy

Oh, but I was such a fool
Thinking you're the only one
It didn't have to be so cruel
Thinking you're the only one

I know that we get down
But we can't touch the ground
Look up, fall into sky
Going at the speed of sound
One circle back around
Straight on, test pilot, fly

R: (x2)
