

I Wonder

TWiiNS

You know you take me higher almost everyday
You know I love you endlessly there in no other way
I can't imagine no one taking you place
I can't image looking into somebody else's face
I know nothing last for good in this lonely world
Like a snow love melts away but even then I'll be your girl
I know you now by heart you are breathing inside my heart
I hope that trails of this life would never brake us apart

I wonder if we're still together many years from now
I wonder if you gonna love me the way you do right now
I wonder if I'm still your woman after all these years
Are we gonna be in love that I wonder

So easy to be happy when life is going well
You only shows your true colors when life gets to be hell
No matter what we'll go through just wanna see us make it through
Never let nothing get to us cuz I'm in love with you
I wanna know if we'll survive what others can't make through
I wanna know if we stay strong
Through hard times with me and you
I wanna know if we won't change and still remain the same
I hope we're gonna stay loyal there is no one ever to blame

Don't let anything come in the way between us
Don't let anyone come in the way between us
Only time will tell how we end up in this life
I wonder if we're still together
