

It's so long ago now that you used to care
Walked out and left me and I don't know where
So many times I must have read the last line
In the letter you left instead of saying goodbye

But still I miss you so much
Can't stop the memory of your touch

You know I miss you night and day
I don't know what else I can say
You know I miss you day and night
That's right
You know I miss you night and day
Is this a game you like to play
You know I miss you day and night
That's right

It seems like so much time has gone by
How did I hurt I wish I know why
Questions keep circling around in my head
Who are you with now who's in your bed.
