

# I Never Get Used To What You Do

Twila Paris

I look on the outside  
You look on the heart  
Where I see an ending  
You can see another place to start  
And every time I see Your hand reach down  
I know a lonely child has just been found

But I never get used to what You do  
I never get used to watching You  
Take a life beyond redemption  
Make it yours and make it new  
I never outgrow the miracle  
A heart that was empty flowing full  
I never get used to what You do

I grew up surrounded by  
The Family of Life  
You'd think I would know by now  
You'd think I would never be surprised  
But every time it takes my breath away  
And I think it is time You heard me say

I never get used to what You do  
I never get used to watching You  
Take a life beyond redemption  
Make it yours and make it new  
I never outgrow the miracle  
A heart that was empty flowing full  
I never get used to what You do

Father of grace and love without end  
God of forgiveness, Faithful Friend  
Every time I see Your hand reach down  
Another lonely child has just been found  
Every day Your mercy is brand new  
And we would all be lost if not for You

I never get used to what You do  
I never get used to watching You  
Take a life beyond redemption  
Make it yours and make it new  
I never outgrow the miracle  
A heart that was empty flowing full  
I never get used to what You do  
I never get used to what You do

Never get, never get  
Never get used to what You do  
Never get, never get  
Never get used to what You do  
Never get, never get  
Never get used to what You do

Never get, never get  
Never get used to what You do  
Never get, never get  
Never get used to what You do

Never get, never get  
Never get used to what You do

Never get, never get  
Never get used to what You do  
Never get, never get  
Never get used to what You do  
Never get, never get  
Never get used to what You do
