

Beg For The Night

Twin Shadow

Come beg for the night
Feel a bit more
Don't cry in the dark
Just open the door

I want all the words
Sung from your lips
I know it's absurd
To shake when we kiss
Here he comes...

Here comes your love
He longs to be near you
Here comes the summer
I have to be with you

When this love starts
Won't hurt anymore
Will you need me again?
You've been all on your own
When this love starts
Won't hurt anymore
If you need me again let me know

I'm in love with the light
To show a bit more
I will wait for the night
If you open the door

I want every word
I'm hung on your lips
I know it's absurd
To cherish every kiss

Here he comes

Here comes your love
He longs to be near you
Here comes the summer
I have to be with you

When this love starts
Won't hurt anymore
Will you need again?
You've been all on your own
When this love starts
Won't hurt anymore
If you need me again then let me know
