

We came up so carelessly  
Boys were falling at your feet  
Proud to have you next to me  
But I was hanging desperately  
Twisted emotions down low  
Every door closing forever to go  
And I can often lose control  
I push it down so it doesn't show

I will beg for it, you won't for me

Do you know why I stumble  
When I'm way down on my knees  
I've been racing through a half life  
And it's taking its toll on me  
Do you know what I suffer  
In this cold hard company  
Guess I'll see you in this half life  
When it's taking over me

I know I'm cold and chemical  
It's the lie I can't control  
So dark and low  
So dark and low  
I know you hate how I react the kind of pain that makes you laugh  
It's coming fast  
It's coming

I won't wait for it, you won't for me

Do you know why I stumble  
When I'm way down on my knees  
I've been racing through a half life  
And it's taking its toll on me  
Do you know what I suffer  
In this cold hard company  
Guess I'll see you in this half life  
When it's taking over me

Taking over me  
It's taking over me  
It's taking over me

Now you know why I stumble  
When I'm way down on my knees  
I been wasting through a half life  
And it's taking its toll on me  
Now you know why I suffer  
In this cold hard company  
Guess I'll see you in a half life  
When it's taking over me  
Me  
Me  
Me
