

Oh My God

Twista

I have sex with chickens
Too much time spent dragging the past up
I didn't see you not looking when I messed up
Settling down in your early twenties
Sucked more blood than a backstreet dentist
It don't matter to me
It's all I wanted to be
It's a million miles from here
Somewhere more familiar
Oh my god, I can't believe it
I've never been this far away from home
And Oh my, god I can't believe it
I've never been this far away from home
And Oh my, god I can't believe it
I've never been this far away from home
And Oh my, god I can't believe it
I've never been this far away from home
Great rulers make for greater glory
The only thing growing is our history
Knock me down I'll get right back up again
I'll come back stronger than a powered up Pac-Man
It don't matter to me
It's all I wanted to be
Is a million miles from here
Somewhere more familiar
Oh my god, I can't believe it
I've never been this far away from home
And Oh my, god I can't believe it
I've never been this far away from home
And Oh my, god I can't believe it
I've never been this far away from home
And Oh my, god I can't believe it
I've never been this far away from home
Oh my god, I can't believe it
I've never been this far away from home
And Oh my, god I can't believe it
I've never been this far away from home
And Oh my, god I can't believe it
I've never been this far away from home
And Oh my, god I can't believe it
I've never been this far away from home
And Oh my, god I can't believe it
I've never been this far away from home
