

## Down With Us

Twiztid

They call us strange, they call us twiztid,  
But we remain I'm with the misfits  
Bringing the pain, so you can just get down with us, down with us  
They call us strange, they call us twiztid,  
But we remain I'm with the misfits  
Bringing the pain, so you can just get down with us, down with us  
Woe woe

Temporary pain and everlasting images  
Just like tattoos that cover my appendages  
Practices and scrimmages  
Stay sharp rehearsing lines and sentences  
To kill the man in the mirror  
My own personal nemesis  
Pen inside the ink and no paper  
Now thats a casualty  
I spit dextrose  
My mouth is full of cavities  
You minor outta your league  
You besta call the cavalry  
Terrestrial bodies fall  
Toward the center of gravity  
Meaning your fall if you battle me  
Too tight to rattle me  
Spill ya blood on the canvas  
And hang it in ya gallery  
Full of substance so many empty  
Like their calories  
Allergic to fake bitches  
The doctor call my allergies and  
Pencil an appointment accustomed to disappointment  
We be doing our own thang and gained some new enjoyment  
It's a brand new nightmare  
Bloody and unclear  
To infinity and beyond roll like  
Woody and light year

They call us strange, they call us twiztid,  
But we remain I'm with the misfits  
Bringing the pain, so you can just get down with us, down with us  
They call us strange, they call us twiztid,  
But we remain I'm with the misfits  
Bringing the pain, so you can just get down with us, down with us  
Woe woe

You said I put the eye in evil  
Well let me put a needle in your eye  
And call it a peek hole into your mind  
And I've decided to eat ya  
And i dont give a fuck if you come looking for peace  
Fam to me we all beefin'  
And apparent J's with a meat cleaver  
Quick to clear the block with a chalk  
Call it ya street sweeper fuck a cop  
He just wanted to kill a creature  
Who was fuckin his daughter in a pair of sum sweet sneakers  
Tell me, who gives it how you want it when ya need it

When the rest of em retreated to pleated and even turned their backs  
On the people who really needed I'm just stating facts  
You needa watch the shit you tatt on your back  
And me and Jamie we ain't a couple of hacks  
Roaming the industry lookin' for fat checks  
Were the dopest of what we be the wicked abstract  
And we never going out like that

They call us strange, they call us twiztid,  
But we remain I'm with the misfits  
Bringing the pain, so you can just get down with us, down with us  
They call us strange, they call us twiztid,  
But we remain I'm with the misfits  
Bringing the pain, so you can just get down with us, down with us  
Woe woe

Better get yo hands together,  
Grab a chainsaw, axe, whatever  
It's show time but I'm much worse than  
Dexter and Hannibal Lecter  
Can you handle the pressure  
When you channel and fester the evil professor  
Leave you looking like a pez dispenser  
Tied up in the road with a pentagram in the center  
Evil lose like the number one contender  
Say goodbye to your champ as I consume the pretender

Brought your butcher knives, axes, and wicked shit  
We got blood soaked microphones and we won't quit  
They want drugs, bitches, and a skull to crush  
And all of them are down with us  
We got them knives who love to use  
Their on each and everyone of you  
You might even find a gun or two  
Just know that we do it all for you  
"HELL YEA!"

They call us strange, they call us twiztid,  
But we remain I'm with the misfits  
Bringing the pain, so you can just get down with us, down with us  
They call us strange, they call us twiztid,  
But we remain I'm with the misfits  
Bringing the pain, so you can just get down with us, down with us  
Woe woe
