

# Eat That Up, It's Good for You

Two Door Cinema Club

You would look a little better  
Don't you know  
If you just wore less make-up  
But its hard to realize  
When you're sky high  
Fighting off the spaceships

And so you're drinking in your room  
To make it all go  
It didn't end too soon  
You've got the next one  
You're holding on too long  
You've got to let go  
Your other love is gone  
And you know

Its too late  
Its too late  
You've got another one coming  
And its going to be the same

I tried to find a quiet place that we could go  
To help you make decisions  
But I didn't find it easy to tell them apart  
With double vision

And so you're drinking in your room  
To make it all go  
It didn't end too soon  
You've got the next one  
You're holding on too long  
You've got to let go  
Your other love is gone  
And you know

Its not the same  
Its not the same  
Its not the same  
You're going to tell me that I'm right  
You're going to come back down  
And find yourself  
Where you are again

You didn't know  
You didn't know  
You didn't know  
So don't pretend you saw it now  
Its not something you'd want to happen  
Now you know who you are again
