Deep In The Ground

There's a hole Deep in the ground And I can be found Diggin' it deeper And if you want You can come down Look all around Cause you'll fit right in

Things are lookin' up From way down here So long as you don't stand on me

You know that things are looking Clearer since I closed my eyes And I can see the things I need to see

There's a hole Deep in the ground And I can be found Diggin' it deeper And if you want You can come down Look all around Cause you'll fit right in

Well I don't really care What they say up there Cause I got me a place to go

If you don't know what you want How do you know what you want When I've got what you want right here

There's a hole Deep in the ground And I can be found Diggin' it deeper And if you want You can come down Look all around Cause you'll fit right in
