

In The Arms Of The One Who Loves Me

Ty Herndon

It's amazing to me in a world full of wonders
I wonder for she makes me feel
I've been everywhere under the sun
And there's nothing that can even compete with her touch

It's incredible, her love
It's some kind of miracle

I don't need to take a plane
Fly a mile above the rain
Or stand up on a mountain
And have the world at my feet

She's just gotta smile that smile
There's no other place in the universe
I'd rather be
Than in the arms of the one who loves me

It's a powerful thing to walk through the doorway
Of somebody's heart and somebody's soul
Oh, you know even for always
Wherever you are, wherever you go

And no high can be higher than her eyes
Looking into her mine

I don't need to take a plane
Fly a mile above the rain
Or stand up on a mountain
And have the world at my feet

She's just gotta smile that smile
There's no other place in the universe
I'd rather be
Than in the arms of the one who loves me
Yeah, she loves me, oh

I don't need to take a plane
Fly a mile above the rain
Or stand up on a mountain
And have the world at my feet

She's just gotta smile that smile
There's no other place in the universe
I'd rather be
Than in the arms of the one who loves me
Ohh, in the arms of the one who loves me
